Our Vision

At Racing Unleashed, we create the most engaging motorsports experience that is accessible to everyone everywhere. We strive to break barriers and bring the thrill of racing to enthusiasts of all backgrounds.

As a Software Developer at Racing Unleashed, you will be a crucial player in our engineering team, tasked with designing, developing, and maintaining the core software that powers our sim-racing ecosystem. You'll work hand-in-hand with fellow engineers, designers, and product managers to deliver immersive, high-performance virtual racing experiences for our users.

Software Developer (m/w/d)

We Offer

Working alongside an experienced CIO and a talented team of 8, you'll be the driving force behind our groundbreaking sim-racing software. Your contributions will directly shape the future of virtual motorsports as you take ownership of exciting, high-impact projects.

- Be part of a dynamic startup in the motorsport industry, pushing the boundaries of sim-racing technology from Switzerland.

- Join a close-knit, collaborative team where your ideas are valued, and your work directly enhances the user experience.

- Enjoy a fast-paced environment that promotes innovation, creativity, and gives you the autonomy to drive your projects.

- Play a key role in developing world-class software systems that power immersive racing experiences.

- Take initiative, drive projects, and make meaningful contributions to our growth and sim-racing evolution.
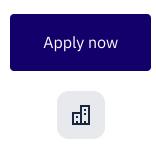

Your Resposibilities

- Write clean, efficient, and scalable code for our sim-racing products.

- Develop and implement new features, enhancing user experience and performance.

- Debug and resolve software issues quickly and effectively.

- Contribute to the design and architecture of our software to ensure scalability and flexibility.

- Collaborate with the engineering team on tech stack decisions and frameworks.

- Create and execute unit tests, participate in code reviews, and maintain software quality.

- Optimize performance and eliminate bottlenecks.

- Partner with cross-functional teams to gather requirements and refine specifications.

- Work with UI/UX designers to ensure a seamless user experience.

- Document designs, code, and processes for easy knowledge sharing.

Join Our Team - desired Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or related field (Master's preferred).

- Strong experience in software development with expertise in C# (Python is a plus).

- Solid understanding of relational databases, particularly MS SQL.

- Expertise in software development best practices, design patterns, and version control (Azure DevOps, GitLab, CI/CD).

- Strong problem-solving skills with keen attention to detail.

- Knowledge of multiplayer technologies and systems is a plus.

- Excellent communication and teamwork skills.

- Passion for sim-racing or gaming is a big plus.
